nightclerk

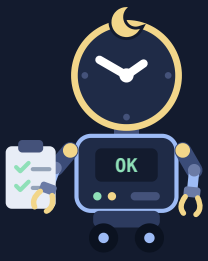

SHOPIFY AUTOMATION · PROPOSAL 2026

Your Shopify store works the night shift.

NightClerk pulls your supplier's products, prices and stock into Shopify every day, automatically. It saves you 10+ hours a week — close to $9,000 a year in staff time.

If something goes wrong, we know first and fix it. You can sleep easy.

10+ hrs	~$9K	24/7
saved every week	saved per year	automated monitoring

WHAT NIGHTCLERK DOES

Everything your supplier changes, in your Shopify store by morning.

Supplier sync

Connects by API, spreadsheet, emailed price list — or your supplier's own website login when there's no API.

Your pricing formula

Your markup on every product, rounded to .99. Lock any price you set by hand; sale prices are never overwritten.

Live stock

Stock refreshed every day with a safety buffer, so you never sell what your supplier can't ship.

Pre-orders & new arrivals

Pre-orders show their ship date and switch to in-stock by themselves the day they land.

Sold-out handling

Sold-out items are marked, hidden from categories, then archived — on the schedule you choose.

Reports & alerts

A report after every run, and an alert the moment something needs your attention.

NOT ANOTHER APP

We set it up. We keep it running.

A TYPICAL SYNC APP

You install it and configure it yourself

NIGHTCLERK

We connect your supplier and set every rule for you

A TYPICAL SYNC APP

Needs a supplier API or data feed

NIGHTCLERK

API, spreadsheet, emailed price list — or the supplier's own website login

A TYPICAL SYNC APP

Generic markup settings

NIGHTCLERK

Your exact pricing formula, pre-order dates and sold-out timing

A TYPICAL SYNC APP

When the supplier site changes, it breaks and you troubleshoot

NIGHTCLERK

We get the alert and fix it — included in your plan

A TYPICAL SYNC APP

You check whether it worked

NIGHTCLERK

Every run is checked automatically — problems are stopped first, then we're alerted to fix them

SOMEONE IS WATCHING THE NIGHT SHIFT

When something breaks, we know before you do.

Checked before anything is written

Bad data — like half the products suddenly missing, or a price of $0 — is stopped automatically and never reaches your store.

Spot-checked after every run

We re-read random products in Shopify after each run to confirm the price and stock really match.

We know when a run doesn't happen

If a scheduled sync doesn't finish on time, we're alerted immediately.

Fixes are included

Repairs are part of your monthly plan. No extra invoice.

MONITOR LOG

2:00 AM
Data checked before writing

2:14 AM
4,822 products synced

2:15 AM
5 random products spot-checked

Next night
Supplier feed half empty — stopped, store untouched, we were alerted

YOUR STORE, YOUR KEYS

Handing over your store? Here's how we protect it.

"Will you see my orders and customer details?"

No. The sync runs through a Shopify app you install yourself, limited to products, stock and locations. It can't see orders, customers or payouts. Any extra permission needs your approval by email first.

"Is my supplier login safe with you?"

Your password is stored encrypted and used only by your sync. If your supplier allows extra users, we use a separate login. Change it any time. When the agreement ends, we delete it within 7 days and confirm by email.

"You'll know my suppliers and prices. Will you open a store like mine?"

No — and it's in the contract. During the agreement and for 18 months after, we won't run a store selling your product category in Canada, or use your supplier details to buy from them. Your suppliers, costs, prices and sales stay confidential.

"What if I want to stop?"

Your store, accounts and data were always yours. The sync stops, and everything already in your store stays exactly where it is.

YOUR STORE, YOUR KEYS

In the agreement

Every owner asks these questions before signing. Here are our answers — and every one of them is written into your service agreement.

3	Shopify permissions only: products, stock, locations
18 months	no competing store after the agreement ends
3 years	your supplier and price details stay confidential
7 days	to remove our access and delete your logins

Every promise on this page is in the NightClerk service agreement. Ask to read it before you sign.

WHAT YOU SAVE

Hours back. Fewer mistakes. No extra staff.

One real night for a 4,800-product store on NightClerk — and what that work would take by hand.

6,223
updates in one night
prices, stock levels and labels

50+ hrs
if done by hand
at just 30 seconds per update

0 min
of the owner's time
it ran while the owner slept

~$9K
saved per year
vs. a part-timer at 10 hrs/week, $20/hr, after Starter fees

A part-timer vs NightClerk

$700+ / month
A part-time staff member spending 10 hours a week on listings and stock — plus typos, sick days and holidays.

$288 / month
NightClerk Pro does the same work every day, on schedule, and never clocks out.

WHAT YOU SAVE

The costly mistakes it prevents

Selling what's gone

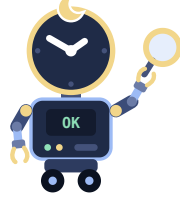

Orders for items your supplier no longer has mean refunds, apologies and bad reviews. A safety buffer stops it.

Selling below cost

When a supplier raises prices, stale listings lose money on every sale. Prices follow cost automatically.

Typos

$9.99 typed as $99.90 — or the reverse. A formula never mistypes.

PRICING

Every price, right here. No hidden costs.

NightClerk Starter

For new and small stores

$888 one-time setup

$88 per month

- 1 supplier — API, CSV or Google Sheet
- Extra suppliers: $388 setup + $38/month each

- Curated mode: you pick what to sell
- Your markup formula on every product
- Daily stock sync with safety buffer
- Sold-out items handled automatically
- 24/7 automated monitoring and error alerts

NightClerk Pro Most complete

For established and growing stores

$2,888 one-time setup

$288 per month

- Up to 10 suppliers, including supplier logins
- Unlimited products
- Curated, rule-based or full-catalog mode
- New products listed automatically
- Pre-order rules and auto switch to in-stock
- Storefront automation: hero slides, collections, badges
- Custom rules and add-ons for your workflow

PRICING

Included, guaranteed, live in four steps.

Included in every plan

Setup and test run · Cloud scheduling · 24/7 automated monitoring and error alerts · Run reports · Monthly time-saved report · Ongoing maintenance · Fixes when your supplier's website changes

Our guarantee

Nothing goes live until you approve the test-run report. If we can't connect your supplier, your setup fee is refunded in full.

All prices in CAD. 12-month service agreement. Stores with more than 5,000 products or complex supplier websites are quoted before you commit.

Live in four steps.

01 Connect

We connect your supplier's catalog to your Shopify store.

02 Set your rules

What to sell, your markup, minimum stock and sold-out timing.

03 Approve a test run

You see a full report of every change before a single product moves.

04 Go live

NightClerk runs in the cloud on schedule. Your computer can stay off.

GETTING STARTED

Good questions

What happens when my supplier changes their website?

Our monitoring catches it, and we fix the connection — usually before you notice. That's included in your monthly plan.

Could a sync error mess up my store?

No. Every run checks the data before writing anything. If something looks wrong, the whole run is stopped and your store stays as it was — and we're alerted to fix it.

What if I have more suppliers?

Starter includes 1 supplier and Pro includes up to 10. Each extra supplier is $388 setup + $38/month — no custom quote needed.

Is it a free trial?

No — it's a set-up service, so it runs from day one. Instead, you approve a full test-run report before anything goes live, and if we can't connect your supplier your setup fee is refunded.

How do I know it's actually saving time?

Every run is logged. Your monthly report shows how many prices, stock levels and listings were updated, and how many hours that work would have taken by hand.

Is my supplier login safe?

Your login is stored encrypted, used only by your sync and never shared. Change the password any time — tell us and we update it. When the agreement ends we delete it within 7 days.

Let your store work the night shift.

Book a 15-minute call: your suppliers, your product count, and what takes you the most time today.
